SEATTLE, WA 98101				
			MAIL DATE	DELIVERY MODE
			08/06/2008	PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/660,302	Applicant(s) AYARS ET AL.
	Examiner SAOUSSEN BESROUR	Art Unit 2131

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED. (35 U.S.C. § 133).

Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

1) Responsive to communication(s) filed on 01 April 2008.

2a) This action is FINAL. 2b) This action is non-final.

3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

4) Claim(s) 1-32 is/are pending in the application.

4a) Of the above claim(s) _____ is/are withdrawn from consideration.

5) Claim(s) _____ is/are allowed.

6) Claim(s) 1-32 is/are rejected.

7) Claim(s) 24 and 32 is/are objected to.

8) Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

9) The specification is objected to by the Examiner.

10) The drawing(s) filed on _____ is/are: a) accepted or b) objected to by the Examiner.
 Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
 Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).

11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).

a) All b) Some * c) None of:
 1. Certified copies of the priority documents have been received.
 2. Certified copies of the priority documents have been received in Application No. _____.
 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

1) Notice of References Cited (PTO-892)
 2) Notice of Draftsperson's Patent Drawing Review (PTO-948)
 3) Information Disclosure Statement(s) (PTO/DS/02)
 Paper No(s)/Mail Date _____

4) Interview Summary (PTO-413)
 Paper No(s)/Mail Date _____

5) Notice of Informal Patent Application
 6) Other: _____

DETAILED ACTION

1. This action is in response to amendment filed 4/1/2008. Claim 19 was amended Claims 1-32 are pending.

Response to Arguments

2. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Allowable Subject Matter

3. **Claims 24 and 32** are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. **Claims 1-10, 12-23, and 25, 26 and 28-31** are rejected under 35 U.S.C. 103(a) as being unpatentable over Safadi (20030126086) in view of Sun et al. (20040237067).

As per **claim 1**, Safadi discloses: receiving electronic data (0022) and encrypting the data in accordance with the selected digital rights management system (0023, 0024, and 0028). Safadi does not explicitly teach receiving a selection of one of a plurality of digital rights management systems. However, Sun discloses: receiving a selection of one of a plurality of digital rights management systems (0019, 0024). Therefore it would have been obvious to one with ordinary skill in the art at the time the invention was made to use the teachings of Sun in conjunction with the teachings of Safadi for the benefit of customized software applications (0020).

As per **claim 8**, Safadi discloses: receiving a plurality of digital data files, the files utilizing a plurality of different file format types (0022, 0024); reformatting the files in accordance with the format types (0024-0025); receiving a user selection of a first digital rights management system, the first digital rights management system being one of a plurality of pre-determined digital rights management systems (0028); encrypting the reformatted files according to the selected digital rights management system (0028); and transmitting the encrypted files to a plurality of consumers (0028-0030, 0033). However, Sun discloses: receiving a selection of a plurality of file format types (0019, 0024). Therefore it would have been obvious to one with ordinary skill in the art at the time the invention was made to use the teachings of Sun in conjunction with the teachings of Safadi for the benefit of customized software applications (0020).

Art Unit: 2131

As per **claim 11 and 27**, Safadi discloses: retrieving unencrypted data from the input file (0028); encrypting the unencrypted data according to the first digital rights management system (0028); receiving an identifier of a second file format type for use in an output file, the second file format type being one of a plurality of pre-determined file format types (0024-0026, 0028); and creating the output file according to the second file format type, wherein the output file contains the encrypted data (0028).

Safadi does not explicitly teach receiving an identifier of an input file, the input file containing input data (0035); determining a first file format type used in the input data, the first file format type being one of a plurality of pre-determined file format types (0036); receiving an identifier of a first digital rights management system, the first digital rights management system being one of a plurality of pre-determined digital rights management systems (0036). Therefore it would have been obvious to one with ordinary skill in the art at the time the invention was made to use the teachings of Sun in conjunction with the teachings of Safadi for the benefit of customized software applications (0020).

As per **claim 19**, Safadi et al. discloses: receiving electronic data encrypted according to a first digital fights management system (0028); decrypting said electronic data (0026, 0028); re-encrypting said electronic data in accordance with said selected digital rights management system (0028). Safadi does not explicitly teach receiving a selection of one a plurality of digital fights management systems to be applied to the data, wherein the first digital rights management system and the selected digital rights management system are

Art Unit: 2131

different. However, Sun discloses: receiving a selection of one a plurality of digital rights management systems to be applied to the data, wherein the first digital rights management system and the selected digital rights management system are different (0019, 0024). Therefore it would have been obvious to one with ordinary skill in the art at the time the invention was made to use the teachings of Sun in conjunction with the teachings of Safadi for the benefit of customized software applications (0020).

As per **claim 23**, Safadi discloses: first storage device storing an input data file (Fig. 1 #30, #32, #52); a second storage device (Fig. 1 #30, #32); a translation computer (Fig. 1 #100); determine a second file format type for a data output file (0024-0026, 0028); and write the data output file containing the newly-encrypted data to the second storage device using a file writer class corresponding to the second file format type (0024, 0028).

Safadi does not explicitly teach a digital rights management system encryption library, accessible by the translation computer, the encryption library comprising a plurality of classes, each class configured to create a software module configured to encrypt data according to a particular digital rights management system; a file format type library, accessible by the translation computer, the file format type library comprising a plurality of classes, each class configured to create a software module configured to read data using a different file format type; a file writer library, accessible by the translation computer, the file writer library comprising a plurality of classes, each class configured to create a software module configured to write to a different file format type; and a driver

Art Unit: 2131

module configured to: determine a first file format type of the input file; obtain input data from the input file using a file format class corresponding to the first file format; select a first digital rights management encrypting class from the plurality comprising the digital rights management systems library; encrypt the input data according to the first digital rights management system encrypting class.

However, Sun discloses: a digital rights management system encryption library, accessible by the translation computer, the encryption library comprising a plurality of classes, each class configured to create a software module configured to encrypt data according to a particular digital rights management system (0019, 0024); a file format type library, accessible by the translation computer, the file format type library comprising a plurality of classes, each class configured to create a software module configured to read data using a different file format type (0019, 0024, 0035); a file writer library, accessible by the translation computer, the file writer library comprising a plurality of classes, each class configured to create a software module configured to write to a different file format type (0028); and a driver module configured to: determine a first file format type of the input file (0036); obtain input data from the input file using a file format class corresponding to the first file format (0036); select a first digital rights management encrypting class from the plurality comprising the digital rights management systems library (0035); encrypt the input data according to the first digital rights management system encrypting class (0035-0036).

Therefore it would have been obvious to one with ordinary skill in the art at the

Art Unit: 2131

time the invention was made to use the teachings of Sun in conjunction with the teachings of Safadi for the benefit of customized software applications (0020).

As per **claim 2**, rejected as applied to claim 1. Safadi discloses: receiving data encrypted according to a first digital rights management system, wherein the first and selected digital rights management systems are different (0024-0026, 0028).

As per **claim 3**, rejected as applied to claim 2. Safadi discloses: decrypting the received electronic data according to the first digital rights management system (0028).

As per **claim 4**, rejected as applied to claim 1. Sun discloses: receiving a selection of one of a plurality of compression techniques, and reformatting the received electronic data in accordance with the selected compression technique (0019, 0024).

As per **claim 5**, rejected as applied to claim 4. Sun discloses wherein a consumer selects the digital rights management system and the compression technique (0016-0019).

As per **claim 6**, rejected as applied to claim 4. Sun discloses wherein an operator selects the digital rights management system and the compression technique (0039).

As per **claim 7**, rejected as applied to claim 4. Sun discloses wherein a software module is configured to select the digital rights management system and the compression technique (0035).

As per **claim 9**, rejected as applied to claim 8. Safadi discloses: the least one of the received files is protected by a second digital rights management system, and further comprising decrypting the at least one file in accordance with the first digital rights management system prior to reformatting the at least one file (0028).

As per **claim 10**, rejected as applied to claim 8. Furthermore, Sun discloses: dynamically creating at least one of a format object or a writer object corresponding to the file format types of the received files and the selected file format types, and wherein reformatting the files comprises using the dynamically-created format object or writer object to reformat the files (0019, 0024, see claim 20).

As per **claim 12**, rejected as applied to claim 11. Furthermore, Safadi discloses: determining a first compression format used in the input file (0028).

As per **claim 13**, rejected as applied to Claim 12. Furthermore, Safadi discloses retrieving unencrypted data comprises decompressing compressed data from the input file according to the first compression format (0024).

As per **claim 14**, rejected as applied to claim 12. Furthermore, Safadi discloses (i) receiving an identifier of a second compression format to be used in the output file, the format being one of a plurality of pre-determined compression formats, (ii) compressing the unencrypted data according to the second compression format, and (iii) encrypting the compressed unencrypted data (0022-0024, 0028).

As per **claim 28**, rejected as applied to claim 27. Furthermore, Safadi discloses: determine a first compression format used in the input file, and wherein retrieving unencrypted data from the input file comprises decompressing compressed data from the input file according to the first compression format (0024, 0026).

As per **claim 15, 29 and 30**, rejected as applies to Claim 11, 27 and 28. Furthermore, Sun discloses: receiving an identifier of a second digital rights management system used in the input file, the second digital rights management system being one of a plurality of pre-determined digital rights management systems (0039)

As per **claim 16**, rejected as applied to claim 15. Furthermore, Safadi discloses decrypting the input data according to the rules of the second digital rights management system (0028).

As per **claim 17 and 31**, rejected as applied to Claim 11 and 27. Furthermore, Sun discloses generating digital rights management system rules, and writing the generated digital rights management system rules to the output file according to the first digital rights management system (0035).

As per **claim 18**, rejected as applied to claim 15. Furthermore, Sun discloses (i) retrieving digital fights management system rules from the input file, (ii) mapping the retrieved digital rights management rules to rules in accordance with the first digital fights management system, and (iii) writing the mapped rules to the output file (0035).

Art Unit: 2131

As per **claim 20**, rejected as applied to 19. Safadi discloses: wherein the first and the selected digital rights management systems differ in that each uses different data encryption from the other (0028).

As per **claim 21**, rejected as applied to claim 20. Safadi discloses: decompressing the received data according to a first compression technique and recompressing the decompressed received data according to a second compression technique (0024, 0026).

As per **claim 22**, rejected as applied to claim 21. Furthermore, Safadi discloses: converting the data from a first file format type to a second file format type, wherein the second file format type is compatible with the selected digital rights management system (0024, 0026).

As per **claim 25**, rejected as applied to claim 23. Furthermore, Safadi discloses: a digital rights management decryption library, accessible by the translation computer, the decryption library comprising a plurality of classes, each class configured to create a module configured to decrypt media content according to a particular digital rights management process, and the driver being further configured to (i) determine a second digital rights management system used by the input file, and (ii) decrypt the input data using a digital rights management decryption class corresponding to the second digital rights management system (0028).

As per **claim 26**, rejected as applied to claim 23. Furthermore, Sun discloses: a digital rights rules library, accessible by the translation computer, the digital rights rules library comprising a plurality of classes, each class comprising

Art Unit: 2131

a plurality of data access rules compatible with the first digital rights management system (0019, 0024).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to SAOUSSEN BESROUR whose telephone number is (571)272-6547. The examiner can normally be reached on M-F 8:30am to 5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ayaz Sheikh can be reached on 571-272-3795. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
